March 20, 1974

Dear Shuya,

Sorry I am so slow. I have just acquired a shipping carton for your McIntosh and will send the stuff out this week. I spent a week in the hospital. I hurt my back lifting an AV-5000, and they put me in traction but I feel OK now.

I have decided to buy the new synthesizer for myself. I will pay back the Center the \$1200 I paid to you with the money the Center owes me. By the middle of April I will send you a check for the rest of what I owe you. Now we will have upstairs video. Since I cannot often use the machine downstairs, and I want to explore the possibilities of your synthesizer I guess it is time to put my ass and cash into it. It is performing beautifully. I beat Walter Wright out of his sync generator with the promise that he could use the synthesizer once in a while, so with my old Hewlett Packard oscillators, a couple of old cameras and some odds and ends I am in business. I will send you a tape some day. The synthesizer will be in three shows within the next month.

I hope you and your family are all well.
